No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1985 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 32

NUMBER 1, AUGUST 1985

J. A. STRATIS AND G. S. VASILIKIOTIS. Indirect Determination of Thiocyanate and Selenocyanate by Atomic Absorption Spectrometry and Solution Spectrophotometry . . . 1

K. N. THIMMAIAH, H. SANKEGOWDA, AND K. KRISHNA MURTHY. Extractive Spectrophotometric Determination of Molybdenum as a Thiocyanate–2-Acetylpyridinethiosemicarbazone Complex . . . 8

A. G. HAMZA, A. B. FARAG, AND A. AL-HERTHANI. Detection and Semiquantitative Determination of Cadmium and Copper Using Polyurethane Foam Loaded with Selective Reagents . . . 13

WALTER S. SELIG. The Microdetermination of Cyanide Complexes of Group VIIIA, IB, and IIB Elements . . . 18

O. COUFALOVÁ, G. RUDZITIS, G. MEŽARAUP, AND L. ČERMÁKOVÁ. An Extraction–Spectrophotometric Determination of Palladium with 4-(2-Pyridylazo)resorcinol in the Presence of Diphenylguanidine . . . 24

BRENT MATTHEWS AND GEORGE F. ATKINSON. A Solid-State Dichrotitrator . . . 30

N. ZIMOVÁ-ŠULCOVÁ, I. NĚMEC, K. WAISSER, AND H. L. KIES. Study of the Electrochemical Oxidation of Phenothiazine Derivatives in Acetonitrile Medium. II. The Effect of the Structure on Voltammetric Behavior . . . 33

MICHAEL R. DITUSA AND ALFRED A. SCHILT. Simultaneous Spectrophotometric Determinations of Cobalt, Nickel, and Iron . . . 44

KIYOHISA OHTA, BENJAMIN SMITH, AND JAMES D. WINEFORDNER. Determination of Copper in Seawater by High-Temperature Gas Chromatography with an Atomic Absorption Spectrometric Detector . . . 50

SHANE S. QUE HEE, TIMOTHY J. MACDONALD, AND ROBERT L. BORNSCHEIN. Blood Lead by Furnace–Zeeman Atomic Absorption Spectrophotometry . . . 55

M. ROMÁN CEBA, J. C. JIMÉNEZ SÁNCHEZ, AND T. GALEANO DÍAZ. Cyclopentane-1,3-dione Bis(4-methylthiosemicarbazone) Monohydrochloride as a Spectrophotometric Reagent for the Determination of Chlorate in Perchloric Acid Medium . . . 64

J. C. JIMÉNEZ SÁNCHEZ AND J. M. LEMUS GALLEGO. 1,3-Cyclohexanedione Bis(4-methylthiosemicarbazone) Monohydrochloride as Analytical Reagent for Spectrophotometric Estimation of Nitrite . . . 69

J. BAREK, A. BERKA, AND V. BOREK. The Oxidation of Organic Substances with Compounds of Trivalent Manganese. XXVII. The Oxidation of 4,4′-Dihydroxyazobenzene with the Diphosphate Complex of Trivalent Manganese . . . 76

T. KOWALSKA. On the Influence of Sorbent Activity, Mobile Phase Polarity, and Structure of the Investigated Substances on Thermodynamic Characteristics of the Chromatographic System . . . 79

RADI SALIM AND BASSEM SHRAYDEH. Sensitive Spectrophotometric Determination of Bismuth(III) with 2-(5-Bromo-2-pyridylazo)-5-diethylaminophenol . . . 83

L. GRAMICCIONI, M. R. MILANA, AND S. DI MARZIO. A Head-Space Gas-Chromatographic Method for the Determination of Traces of Ethylene Oxide in Sterilized Medical Devices 89

J. BAREK, A. BERKA, AND V. BOREK. The Use of Redox Reactions in the Analysis of Dyes and Dye Intermediates. XVI. The Influence of Proton Donors on Direct Current Polarographic Behavior of 4,4′-Disubstituted Azobenzenes in Acetonitrile . . . 94

J. BAREK, A. BERKA, AND V. BOREK. The Use of Redox Reactions in the Analysis of Dyes and Dye Intermediates. XVII. The Influence of Proton Donors on Direct Current Polarographic Behavior of Some Water-Insoluble Azo Pigments in Acetonitrile . . . 105

J. BAREK, A. BERKA, AND V. BOREK. The Use of Redox Reactions in the Analysis of Dyes and Dye Intermediates. XVIII. Determination of 4,4′-Disubstituted Azobenzenes in Acetonitrile Using TAST and DP Polarography . . . 113

C. LUU-DUC, C. CHARLON, A. MARSURA, C. BENEY, AND C. FENIOU. Synthesis of 3-[5-Anilino-(2,3-d)-dioxole-1,3]-1-oxo-1,3-dihydro-2-benzofurane . . . 120

LETTERS TO THE EDITOR

ANNOUNCEMENT 388

AUTHOR INDEX FOR VOLUME 32 389

Digitized by the Internet Archive
in 2026

https://archive.org/details/microchemical-journal_1985_32_contents

INFORMATION FOR AUTHORS

The MICROCHEMICAL JOURNAL will invite research papers on all phases of chemistry, including clinical and biochemical, which involve small-scale manipulation. This will include both organic and inorganic work on preparation, purification, separation, detection, determination, trace analysis, and all types of instrumentation.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be nor is presently submitted elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out; further, that any person cited as a source of personal communications has approved of the citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in the *Microchemical Journal* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Address. Manuscripts should be submitted to **Dr. Peter N. Keliher, Chemistry Department, Villanova University, Villanova, Pennsylvania 19085.** Manuscripts in the area of Bioanalytical Chemistry should be submitted to **Dr. Paul Hemmes, Miles Laboratories, Ames Division 18-C-1, Post Office Box 70, Elkhart, Indiana 46515.**

Manuscripts should be concise and consistent in style, spelling, and use of abbreviations. American spelling conventions should be used. At least two copies should be submitted, each copy to include all figures and tables. The original copy must be typewritten, double-spaced, on one side of white bond paper, about 8½ × 11 inches in size, with one-inch margins on all sides. Each manuscript should have a separate title page noting title of article, authors' names (without degrees), a running title (not exceeding 35 letters and spaces), and address to which proof should be mailed. Please number all pages of manuscript.

Authors are encouraged to use descriptive subheadings in this order: Abstract, Introduction, Materials and Methods, Results, Discussion, Acknowledgments, and References. Every article should have a definitive title. The use of series numbering is strongly discouraged.

In the Methods section, authors should draw attention to any particular chemical or biological hazards that may be involved in carrying out the experiments described. Any relevant safety precautions should be described: if an accepted code of practice has been followed, a reference to the relevant standards should be given.

Units of weight, measures, etc. when used in conjunction with numerals should be abbreviated and unpunctuated (e.g., 10%, 50 ml, 3 g, 8 cm, 5 μg, 3 μl).

Names of compounds should agree with those presently in use by Chemical Abstracts.

Figures should be numbered consecutively with Arabic numerals in order of mention in the text: each figure should have a descriptive legend. Legends should be typed together on a separate sheet, double-spaced.

All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. This includes the lettering which is reproduced as part of the photoreproduction and is not set in type. (Lettering should be done with a lettering device, such as a Leroy.) Line drawings should be carefully drafted with black India ink on white drawing paper or blue drafting cloth, no larger than 8.5 × 11.5 inches (21 × 27.5 cm). The lettering should be large enough so that when reduced by two-thirds it will still be legible. High quality glossy prints are acceptable. Xerox prints are not acceptable. Illustrations in color can be accepted only if the authors defray the cost.

Tables should be typed on separate pages, numbered consecutively with Arabic numerals in order of mention in the text. All tables should have descriptive headings, typed (double-spaced) above the table.

Footnotes should be designated in text by superscript numbers and listed on a separate sheet: in tables, by superscript letters and placed at bottom of page containing table.

References should be arranged alphabetically and numbered in the list in sequence. The text cita-

tions may then consist of either just the italic number of the reference enclosed in parentheses and set on the text line or of the name (or names) of the author(s) followed by the italic number enclosed in parentheses. In the text citation, if there are more than two authors of a given reference use the surname of the first author followed by "*et al.*," "and co-workers," or "and associates." All authors' names should be included in the reference list itself.

For abbreviations of journal titles in the reference list please follow the forms used in *Chemical Abstracts Service Source Index,* 1980.

Pattern styling, punctuation, and capitalization after these examples, noting the particular style for journal articles, books, and edited (multi-author) books.

1. Stevens, P., and Hong, D., The role of myeloperoxidase and superoxide anion in the luminol- and lucigenin-dependent chemiluminescence of human neutrophils. *Microchem. J.* **30,** 135–146 (1984).

2. Allen, R. C., Biochemiexcitation: Chemiluminescence and the study of biological oxygenation reactions. *In* "Chemical and Biological Generation of Excited States" (W. Adam and G. Alento, eds.), Academic Press, New York, 1982.

3. Vanasse, G. A., "Spectrometric Techniques," Vol. 3. Academic Press, New York, 1984.

The use of "personal communication" and "unpublished observations" as citations in the text should be avoided.

Proofs will be sent to the authors with reprint order forms. Fifty reprints of each article will be provided free of charge.
